Trust the Experts Who Deliver

At Verosoft Design (VSD), we are experts in scalable asset management solutions tailored for modern enterprises. With a global footprint spanning North America, Europe, and beyond, we bring over 25 years of experience in helping businesses streamline their operations, reduce maintenance costs, and achieve operational excellence.

Building Future-Ready Systems for Long-Term Growth

- Industry 4.0 ready solutions tailored for medium-to-enterprise clients
- Seamlessly embedded in Microsoft Dynamics 365 Business Central
- Sustainable, scalable products built to grow with your business
- Trusted by leading companies across multiple industries from renewable energy to manufacturing

Chosen by Global Companies for Proven Excellence

Martin Turgeon

CEO of Verosoft Design (VSD)

“Our mission is to empower companies with the tools they need to manage assets effectively, reduce operational costs, and scale their business.”

Industries We Serve

Verosoft Design (VSD) has helped companies across multiple sectors achieve operational efficiency with our flexible, scalable solutions.

Manufacturing

Enabling asset management, inventory tracking, and predictive maintenance for improved uptime.

Renewable Energy

Boosting asset efficiency and streamlining operations with IoT integration and advanced asset hierarchy management to drive sustainable energy growth.

Power & Utilities

Streamlining operations and asset tracking for more reliable service delivery.

Transportation & Logistics

Enhancing infrastructure longevity and maintenance efficiency with linear asset and inspection management solutions.

Facility Management

Helping organizations manage physical assets, reduce maintenance costs, and improve regulatory compliance.

Implementing The Asset Guardian (TAG) has been transformative for our clients, **reducing maintenance costs by 20%** compared to other enterprise solutions. Its seamless integration with Microsoft Dynamics 365 Business Central empowers them to streamline asset management and scale effectively to meet evolving business demands.

Take Control of Your Asset Management

TAG Features

Explore how The Asset Guardian (TAG) delivers impactful features to improve your asset operations. From proactive asset health monitoring and precision infrastructure management to real-time mobility and seamless ERP integration, The Asset Guardian's comprehensive solutions are designed to drive transformation and enhance efficiency.

Asset Health Management

Proactively monitor asset conditions and identify risks in real time to increase reliability and prevent failures.

Capital Project Management

Align financial and asset management data seamlessly to support strategic decisions and efficient workflows.

TAG Mobility Suite

Enable real-time mobile access to boost team productivity, even in offline environments.

Health and Safety Management

Promote safety and compliance by centralizing safety protocols and reducing risks.

Linear Asset Management

Optimize infrastructure performance by managing production lines, utilities, and complex networks with precision.

Cloud-Based Flexibility

Deploy TAG on the cloud for secure, scalable, and accessible maintenance operations.

GIS Integration

Visualize asset locations on an interactive map to prioritize maintenance tasks and manage assets geographically.

Flexible Hosting and Multi-Device Accessibility

On-Premise, Hosted, or Cloud/SaaS

Choose the ideal hosting setup for your organization, whether on-premises, hosted, or through a secure cloud-based SaaS solution.

Multi-Device Access

Stay efficient in the field with a real-time, cross-platform app for Android and iOS. Enjoy a seamless user experience with optimized dashboards that streamline data visibility.

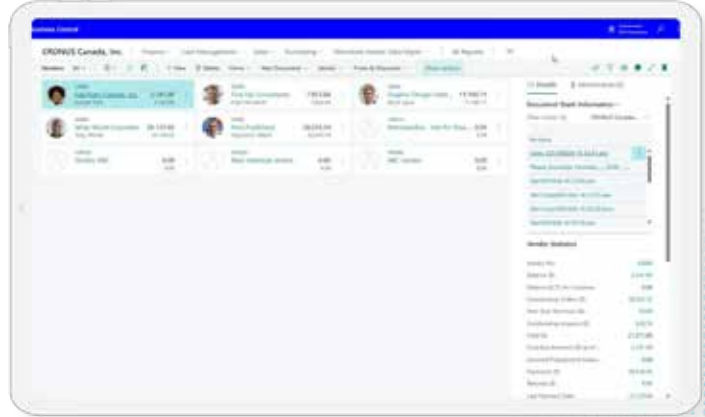

Efficient Data & Document Management Solutions

Our solutions streamline document management, automate workflows, and synchronize data in real-time. Customize digital forms for accurate field data collection, even offline. Enhance efficiency, collaboration, and compliance across your organization.

DocStash

A secure document storage solution integrated with Microsoft SharePoint for seamless access and management.

- **Centralized Document Management:** Easily store and retrieve documents in one location with quick search capabilities.
- **Microsoft SharePoint Integration:** Seamlessly manage, share, and collaborate on documents within the Microsoft ecosystem.
- **Regulatory Compliance:** Automate document retention to meet industry standards and ensure compliance.
- **Secure Role-Based Access:** Control who can view, edit, or delete documents for enhanced security.
- **Version Control:** Track changes and maintain full revision history for audit and collaboration purposes.

Secure, compliant, and organized—discover DocStash today!

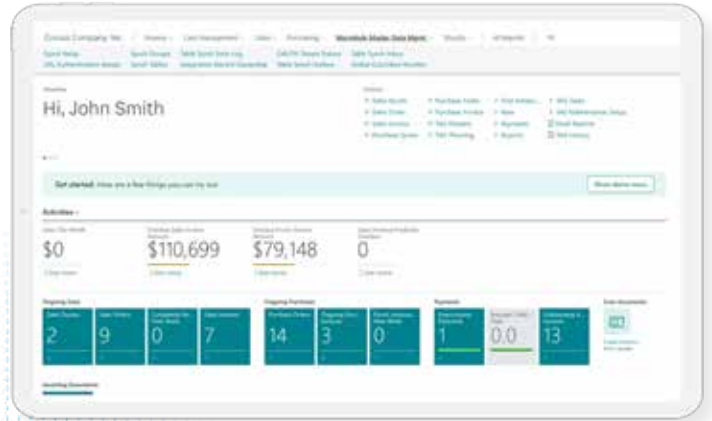

Wormhole

A powerful data synchronization tool that streamlines business workflows and enhances team collaboration. Wormhole turns your ERP into a Tier 1 solution, saving time, reducing Business Central administration costs, and protecting data integrity.

- **Automated Data Synchronization:** Keep data consistent across tenants, databases, and companies with automated sync.
- **Customizable Sync Flows:** Set up bidirectional or unidirectional synchronization to fit your business needs.

- **Business Central Integration:** Sync any Business Central tables, including custom extensions, for seamless compatibility.
- **Granular Control:** Define data management rules at the group, table, field, or field value levels for precise oversight.
- **Real-Time Data Consolidation:** Update and merge data from multiple sources in real-time for enhanced reporting and streamlined cross-company workflows.

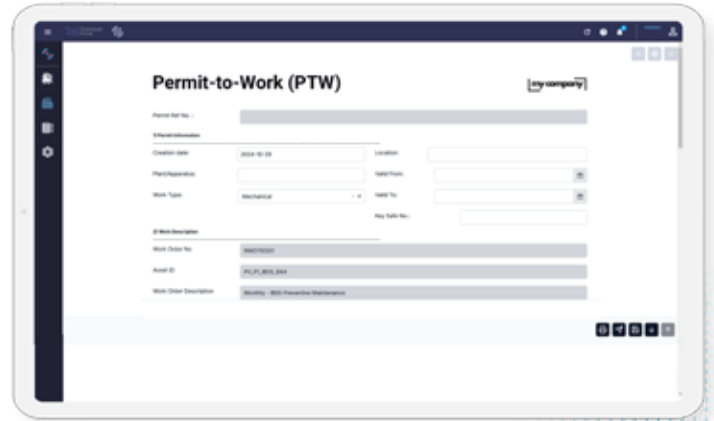

Try Wormhole
FREE for 30 Days!

A customizable digital form solution designed to streamline data collection and improve workflow efficiency, perfect for asset management and field operations.

- **Customizable Digital Forms:** Create tailored forms for different departments and processes to fit your business needs.
- **Real-Time Mobile Data Collection:** Collect accurate data instantly on mobile devices, even offline, with seamless syncing later.

- **Automated Workflows:** Trigger automatic workflows based on form submissions, streamlining task management.
- **Instant Reporting and Multi-Language Support:** Generate real-time reports and use the forms globally with multi-language capabilities.

Trax

A comprehensive time tracking and project management tool seamlessly integrated with Microsoft Dynamics 365 Business Central.

- **Streamlined Project Management:** Manage projects efficiently using Gantt charts and seamless task handling with DevOps job integration.
- **Accurate Time and Job Tracking:** Track time and attendance with mobile clock-in/out functionality linked to project tasks with comprehensive reporting.

- **Optimized Billing Management:** Streamline license renewals, recurring billing, and T&M billing for better financial control.
- **Enhanced Customer Support:** Deliver efficient service with customer and support portals connected to MS Dynamics CRM.
